General Features

Facility Information

Fire Installation Information

Turkis Enerji fuel oil terminal operates in the status of bonded **type A** warehouse with the code no **A33000130**.

It has a tank farm consisting of **304.089,407 cbm** storage capacity , 39 warehouse storage tanks of various sizes and 1 national storage tank of **910,593 cbm** established on an area of **61.000** sqm in the Turkey, Mersin, Akdeniz Karaduvar.

Temperature and level measuring radar system is installed in the tanks.

- Experienced management with decades of experience in the oil industry
- New organisational structure
- Strong financial structure and support from one of Turkey's leading companies
- New investment of over 10 million dollars in the plant
- New fire and electrical infrastructure
- Renovation and upgrade of 40 shore tanks.

There are two buoy systems in our warehouse accomadating **65.000 DWT** and **90.000 DWT** sea vessels. There are three pipelines, **10 inches, 14 inches and 16 inches**, extending to our buoy with a capacity of 65.000 DWT. There is one **16-inch** pipeline extending to our buoy with a capacity of 90.000 DWT.

In addition, **2** flow meter systems have been installed.

There is one national storage tank with a total capacity of **910,593 m³** in the terminal and a marking unit that can inject **500 m³** of national marker per hour has been installed.

Land tanker loading is done with the **2 loading racks with 4-vehicle** capacity top filling and the canopy Neda tanker filling automation system.

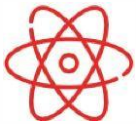

Full bonded warehouse

Storage and transport of clean products and crude oil

Unloading and loading of marine vessels and loading/unloading of land tankers

In-tank product blending subject to customs authorisations

Water cooling system with double sprinklers to prevent product loss in summer.

Transit storage and services to major oil trading companies

- There are 55 employees in total, including subcontractors,
- Terminal employees work in 3 shifts (including subcontractor employees) between 08:00-16:00, 16:00-00:00 and 00:00-08:00.

Fire Installation Information

- There is a **12-inch** fire line and an 8-inch foam line covering the entire facility. In addition, there is a **3,800 cbm** water tank and a **10,000-liter foam tank** and **4,000-liter spare foam**, as well as **10 units of 30-liter foam in the fire cabinets** and **13 units of 200-liter foam in the fire extinguishing tower**.
- There are **2 units of 300 cbm capacity diesel fire pumps**, **2 units of 5 kW electric joker pumps**, **2 units of 55 kW electric fire pumps**, **2 units of 160 kW electric fire pumps**, and **2 units of 330 kW electric fire pumps for intervention**.
- In addition, there are foam rooms and tank cooling sprinklers in the tanks.

There are **11 fire extinguishing towers for throwing water and foam** and **8 remote controlled fire towers that can rotate 360 degrees**. In addition to these, there are **33 fire cabinets**, **60 85 fire hoses**, **78 dry chemical powder fire extinguishers** and **18 CO2 fire extinguishers**, **5 remote foam lances**, **5 close foam lances** and **5 foam makers**.

Turkis Energy terminal has 2 mooring buoys systems with **10", 14" and 16"** sea connections and can load and discharge **1.200 cbm** per hour.

There are two **10" bi-directional meter systems (skids)** that can measure **1.500 cbm** of fluidity per hour connected to sea lines in the terminal.
